Databases

MongoDB,

Platforms/ Tools

AWS, Git

PROJECTS

1. An EdTech website Learning.

- Built an EdTech website with features for video posting, deleting, and updating
 - Developed the back-end using Node.js, Express, Mongoose, and Node modules such as Cloudinary and Multer for image and video handling.
 - Implemented user authentication and authorization for secure access to sensitive data.
 - Designed and developed the front-end with React and Redux for a user-friendly interface
 - Conducted thorough testing and integrated the front-end with the database.
 - Demonstrated full-stack proficiency and used best practices and tools for a dynamic and robust website.
-
